

# Börger Macerating Technology At a Glance

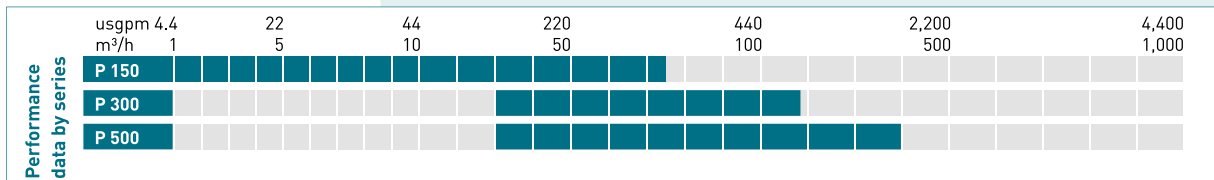

## Multicrusher Dual-Shaft Grinder

- Various sizes
- Flow rates of up to 1,400 usgpm (320 m³/h)
- Space-saving, compact design
- Degree of maceration variable thanks to choice of blade combinations

## Multichopper Single-Shaft Macerator

- Design with or without debris collector
- Flow rates up to 1,750 usgpm (400 m³/h)
- Degree of maceration variable thanks to choice of perforated disks and flow speed

## Rotorrake Single-Shaft Coarse Macerator

- Various sizes
- Flow rates up to 3,500 usgpm (800 m³/h)
- Compact design
- Debris collector
